

A musician is shown in profile, singing into a microphone on a stage. The background is filled with vibrant, out-of-focus stage lights in various colors like blue, green, red, and yellow. The lighting creates a dramatic atmosphere with strong highlights and deep shadows.

**SHURE**<sup>®</sup>

## DETACHABLE. REPLACEABLE. CUSTOMIZABLE.

Shure Sound Isolating™ Earphones feature detachable, Kevlar® reinforced cables that allow for easy replacement and customization.

Add Shure Music Phone Accessory Cables to convert your Earphones into a Stereo Mobile Headset with enhanced controls for music-enabled phones and portable devices. Two versions are available based on device compatibility.

Music Phone Accessory  
Cable (M+/M)  
*sold separately*

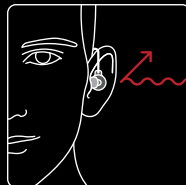

## ISOLATION, NOT CANCELLATION.

Shure Sound Isolating™ Earphones are unlike headphones that feature noise cancelling technology. For listeners seeking maximum audio fidelity, the differences are key:

### ISOLATION

---

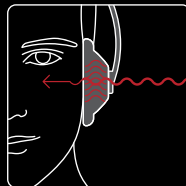

Sound isolating earphones naturally block most background noise for a clear, detailed listening experience.

### CANCELLATION

---

Noise cancellation technology uses active circuitry to counteract background noise, which may introduce artifacts into your audio.

## A PERFECT FIT FOR EVERYEAR.

Sleeves are available in multiple shapes and sizes for maximum comfort, isolation and a customized fit.
