

Phono Cartridge of the Year Sets a New Standard for Vinyl Sound Quality

Axiss Audio Presents the Award-Winning Air Tight PC-1 Cartridge

Los Angeles, CA (PRWeb) March 20, 2007 -- Axiss Audio, a leading distributor of luxury audio equipment, adds to its collection of "best in class" stereo components with the award-winning Air Tight PC-1 phono cartridge. Named "Phono Cartridge of the Year" by the tastemakers at The Absolute Sound in the acclaimed audiophile magazine's 2006 Product of the Year Awards, the Air Tight PC-1 sets the benchmark for analog sound reproduction.

As the exclusive U.S. distributor of the Air Tight brand, Axiss Audio offers analog audio connoisseurs an unparalleled listening experience. As part of a high-end analog playback system, the Air Tight PC-1 cartridge reveals the full richness of vinyl and exposes previously unheard sonic details from the original recordings.

The cutting-edge cartridge performs with exceptional warmth and clarity, producing high-resolution sound across the whole audio spectrum with remarkable dynamic range. Calling the Air Tight PC-1 a "hi-fi gem," The Absolute Sound praises the phono cartridge for its sound reproduction, including its transient speed, staging, trackability, and tonal color.

The impeccable craftsmanship of the Air Tight PC-1 is showcased in its extruded aluminum body and state-of-the-art motor design. The product of years of research by Air Tight's top audio designers, the PC-1 features advanced moving-coil technology that delivers high-energy playback from low impedance circuitry, an achievement that is truly groundbreaking.
