

LP #9 STYLUS CLEANER

INSTRUCTIONS FOR USE

Instructions:

1. Uncap bottle-cap brush from bottle.
2. Gently brush the stylus using back-to-front motion. Never brush the stylus using front-to-back or side-to-side. Apply only to stylus tip and end of cantilever. Take care not to apply fluid inside of cartridge itself.
3. Clean contaminants off to bottle-cap brush with LP #9 fluid decanted to second bottle with eye dropper. You can use a second bottle of LP #9 as a brush cleaning solution.
4. Recap LP #9 bottle tightly to prevent evaporation.

NOTE: Keep out of reach of children. Not for consumption. Keep away from fire. Mobile Fidelity Sound Lab and Record Research Lab are not responsible for cartridge damage as a result of misuse of LP #9.
